Anti Slip - Nosing

Our Anti-Slip Stair Nosing is made from either 316 stainless steel or mild steel with a hard wearing chemically bonded grit top surface for extreme slip resistance.

These non-slip stair nosings have been developed as a cost effective, long term solution ensure the safety of workers working on slippery condition especially on the oil platform.

Specification -

- Choice of 30 or 60 grit size available for industrial and domestic application
- Colour of Safety Yellow as per the standard for the oil and gas industry
- The length of the nosing can be customize to fit the required stairs
- Thickness of the nosing is 1.2 mm to ensure long lasting and the durability of the anti slip
- Material used can either be 316 stainless steel or mild steel based on the customer preference

- Comes in a variety of sizes to fit your needs
